

ENVIRONMENTAL POLICY

Safeguarding the environment is a priority for AV Works. Even though the entirety of our activities has a relatively limited impact, we have made a conscious policy decision to explore every avenue open to us to ensure that care of the environment is a key consideration in our work practices, procedures and methods of operation.

We recognise that all business activities have the potential to cause environmental harm and therefore we accept our responsibility for putting into place environmentally friendly measures which comply with legislative requirements.

We are committed to continually seek to improve environmental performance with a view to reducing the harmful environmental effects of its activities.

We expect similar environmental standards from all suppliers and contractors.

We raise awareness and encourage participation of employees in environmental issues and the environmental effects of their activities.

We are committed to reducing pollutions, emissions and waste and reduce the use of all raw materials, energy and supplies.

We recycle and re-use materials where possible and ensure efficient use of water and energy.

We minimise the use of solvents and CFC's and other ozone-depleting substances.
